TOGAF®

Roadmap

Part I - Introduction
Preface, Executive Overview, Core Concepts, Definitions and Release Notes
Part II – Architecture Development Method
Introduction to ADM
ADM Phase Narratives
Part III – ADM Guidelines and Techniques
Guidelines for Adapting the ADM Process
Techniques for Architecture Development
Part IV – Architecture Content Framework
Content Metamodel
Architectural Artifacts
Architecture Deliverables
Building Blocks
Part V – Enterprise Continuum and Tools
Enterprise Continuum
Architecture Partitioning
Architecture Repository
Tools for Architecture Development
Part VI – Reference Models
Foundation Architecture: Technical Reference Model
Integrated Information Infrastructure Reference Model
Part VII – Architecture Capability Framework
Architecture Board
Architecture Compliance
Architecture Contracts
Architecture Governance
Architecture Maturity Models
Architecture Skills Framework

- Part IV, Architecture Content Framework, Chapter 36

Module Objectives

The aim of this module is to introduce the key deliverables of the ADM cycle:

- The role of Architecture Deliverables
- The purpose of key deliverables

The role of Architecture Deliverables

- The contractual or formal work products of an architecture project
- The definition of deliverable provided by TOGAF is a baseline
- It is thus a starting point for tailoring

Architecture Deliverables

- Architecture Building Blocks
- Architecture Contract
- Architecture Definition Document
- Architecture Principles
- Architecture Repository
- Architecture Requirements
- Architecture Roadmap
- Architecture Vision
- Business Principles, Business Goals and Business Drivers
- Capability Assessment
- Change Request
- Communications Plan
- Implementation and Migration Plan
- Implementation Governance Model
- Organizational model for Enterprise Architecture
- Request for Architecture Work
- Requirements Impact Assessment
- Solution Building Blocks
- Statement of Architecture Work
- Tailored Architecture Framework

Request for Architecture Work

- Sent from the Sponsor to the Architecture Organization
- This initiates a cycle of the ADM
- Created as an output from the Preliminary Phase or an approved architecture Change Request

Statement of Architecture Work

- A deliverable output from Phase A
- A response to the Request for Architecture Work
- A plan for the architecture work

Architecture Vision

- Produced in Phase A
- An aspirational view of the end architecture product
- Its purpose is to agree the desired outcome for the architecture

Communications Plan

- Produced in Phase A
- Allows for a planned and managed process for communication about a new architecture

Architecture Definition Document

- The deliverable container for the core artifacts
 - Business, Data, Application, and Technology architectures
 - Includes baseline, transition and target architectures
 - Developed through phases A, B, C, and D
 - It provides a *qualitative* view of the solution

Architecture Requirements Document

- The deliverable container for the requirements for an architecture
- A companion to the Architecture Definition Document
- It contains measurable criteria – a *quantitative* view
- Often used as a component of the Architecture Contract

Architecture Roadmap

- Incrementally developed throughout phases E and F
 - Informed by the Candidate Roadmap Components identified in phases B, C, and D
- This lists individual increments of change
- Shows progression from Baseline to Target
